General Repair Instructions.....	0A- 2
Notes on The Format of this Manual.....	0A- 3
Identification	0A- 6
Lifting Instructions	0A- 7
Conversion Table.....	0A- 9

GENERAL REPAIR INSTRUCTIONS

1. Park the vehicle on level ground and chock the front or rear wheels before lifting the vehicle.
2. Raise the vehicle with a jack set against the axle or the frame.
3. Support the vehicle on chassis stands.
4. Use covers on the vehicle body, seats, and floor to prevent damage and/or contamination.
5. Disconnect the grounding cable from the battery before performing service operations.
This will prevent cable damage or burning due to short circuiting.
6. Handle brake fluid and antifreeze solution with great care.
Spilling these liquids on painted surfaces will damage the paint.
7. The use of the proper tool(s) and special tool(s) where specified is essential to efficient, reliable, and safe service operations.
8. Always use genuine ISUZU replacement parts.
9. Discard used cotter pins, gaskets, O-rings, oil seals, lock washers, and self-locking nuts at disassembly.
Normal function of these parts cannot be guaranteed if they are reused.
10. Prepare new cotter pins, gaskets, O-rings, oil seals, lock washers, and self-locking nuts for installation.
11. Keep the disassembled parts neatly in groups.
This will facilitate smooth and correct reassembly.
12. Keep fixing nuts and bolts separate.
Fixing nuts and bolts vary in hardness and design according to installation position.
13. Clean all parts before inspection or reassembly.
14. Clean the oil ports and other openings with compressed air to make certain that they are free from dirt and obstructions.
15. Lubricate the rotating and sliding faces of all moving parts with oil or grease before installation.
16. Use the recommended liquid gasket to prevent leakage.
17. Carefully observe all nut and bolt torque specifications.
18. When removing or replacing parts that require refrigerant to be discharged from the Air conditioning system, be sure to use the Vehicle Refrigerant Recovery and Recycling Equipment (VRRRE) to recover and recycle R134a, to promote the movement for the protection of the ozone layer covering the earth.
19. Check and recheck your work. No service operation is complete until you have done this.

NOTES ON THE FORMAT OF THIS MANUAL

1. Find the applicable Section by referring to the index at the front of the Workshop Manual binder.
2. The following technical service information is included in this Section:
 - Identification
 - Maintenance schedules
 - Recommended lubricants
 - Recommended fuels
 - Oil viscosity charts
3. Individual Sections of this Workshop Manual are divided into the following categories:
 - Main data and specifications
 - Torque specifications
 - Recommended liquid gasket
 - Loctite application procedure
 - Servicing
 - Removal and installation
 - Disassembly
 - Inspection and repair
 - Reassembly
 - Troubleshooting
4. Each "Major Components" page of this Workshop Manual has an exploded view of the applicable area.
A brief explanation of the notation used follows:

0A-4 GENERAL INFORMATION

5. Below is a sample of the Workshop Manual text following the "Major Components" page.

A brief explanation of the notation used follows:

Important operations

2. Bearing outer race
 Installer : J-29038
 Grip : J-8092

3. Bearing outer
 Installer : J-2
 Grip

(2) Clean the side bearing bores. Install dial indicator with discs and arbor. Then install and tighten bearing caps to the specified torque.

Torque	kg-m (ft.lbs.)
	7.0 (50)

① Dial indicator : J-8001
 ② Disc (2 pcs.) : J-23597-4
 ③ Arbor : J-23597-1
 ④ Gage plate : J-23597-26

This is the item shown in the illustration. It is marked with a triangle (▲) on the "Major Components" page.

Special or recommended tools are identified by the tool name and/or number. The illustration shows how the tool is to be used.

Letters and numbers within a circle refer to identically labeled parts or measurements in the illustration.

This symbol indicates the type of service operation to be performed. A more detailed explanation of the various symbols follows.

This table gives important service specifications and data.

6. The following symbols appear throughout the Workshop Manual.

They tell you at a glance the type of service operation to perform.

..... Removal

..... Installation

..... Disassembly

..... Reassembly

..... Alignment

..... Directional indication

..... Inspection

..... Measurement

..... Torque Angle Method

..... Adjustment

..... Cleaning

..... Important operation requiring extra care

..... Specified torque

..... ISUZU special tool(s) required or recommended

..... Other special tool(s) required or recommended

..... Lubrication (Oil)

..... Lubrication (Grease)

..... Liquid gasket application

7. Measurement criteria are defined by the terms "standard" and "limit".
A measurement falling within the "standard" range indicates that the applicable part or parts are serviceable.
"Limit" is an absolute value.
A measurement falling outside the "limit" indicates that the applicable part or parts must be repaired or replaced.
8. Components are parts are listed in the singular form throughout the Workshop Manual.
9. The following directional criteria are used throughout the Workshop Manual:
Front:
The cooling fan side of the engine.
Right:
The right-hand side of the engine viewed from the flywheel.
Left:
The left-hand side of the engine viewed from the flywheel.
Rear:
The flywheel side of the engine.
Cylinder numbers are counted from the front of the engine towards the rear.
The engine's rotation is clockwise viewed from the front of the engine.

IDENTIFICATION

CHASSIS NUMBER

The chassis number is stamped on the right-hand side of the chassis side member under the right door.

VEHICLE IDENTIFICATION PLATE

The vehicle identification plate is attached to the upper face of the radiator sill in the engine compartment.

BODY AND OPTION IDENTIFICATION PLATE

The body and option plate shows body style, body serial number, paint and trim colour combination, paint number, engine transmissions, axle ratio options and built date. The built date is defined as 'the date of manufacture' by the calendar month and year in which the body shell and power train sub-assemblies are co-joined or moved from the production line.

LIFTING INSTRUCTIONS

If a lifting device other than the original jack is used, it is most important that the device be applied only to the correct lifting points. (See the illustration.) Raising the vehicle from any other point may result in serious damage.

Lifting Points and Supportable Point-Locations

< 4 x 4 MODEL >

- ① Front axle center
- ② Rear axle center
- ③ Side frame

< 4 x 2 MODEL >

- ① 1st cross member center
- ② Rear axle center
- ③ Side frame

LIFTING POINT; FRONT

4×2 model

- When using floor jack, lift the center of 1st cross member.

4×4 model

- When using floor jack, lift the under surface of skid plate (1) (set the circle depression shape, shown on left picture) or lift the center of front axle case (2).

SUPPORTABLE POINT; FRONT

- Position the chassis stands at the bottom of the frame side member, backward of front wheel.

LIFTING POINT; REAR

- When using floor jack, lift the center of rear axle case.

SUPPORTABLE POINT; REAR

- Position the chassis stands at the bottom of the frame side member, forward of the rear wheel.

Recommended Fluids and Lubricants (For GENERAL EXPORT)

In order to obtain maximum performance and longest service life from your ISUZU vehicles, it is very important to select and use correctly best lubricants and diesel fuels.

When lubricating, be sure to use ISUZU genuine lubricants or recommended lubricants listed below, according to the maintenance schedule for each vehicle model.

The lubrication intervals in the maintenance schedule and coverage and period of new vehicle warranty are based on the use of ISUZU genuine lubricants or recommended lubricants as given in the chart which will serve as a guide for selecting lubricants of proper brand name.

LUBRICATION	MAKE	BRAND / TYPE	GRADE	
			API	ACEA
Petrol engine crankcase	ISUZU GENUINE	BESCO RACING - ACE SJ (5W-30)	SJ
